

E-Commerce Template V2

By tpn web design inc.

Important Notice:

Please install the tween file and put all the attached fonts in your font folder. If you do not install the tween file, nothing will work. You can locate the tween file here: <http://hosted.zeh.com.br/mctween/downloads.html> Download this to your computer. Simply double click and this will bring up Adobe Extension Manger. Follow the steps. Simply restart flash after installing.

Index.html

This file has been modified. The variable “allowfullscreen” has been set to ‘true’. Margins are also set to zero. Please do not overwrite this file unless necessary.

SHOP.FLA

75% of the coding can be found here: “bar” MC

Some variables you can change in this file are:

```
var space:Number = 5;
```

The above variable is for spacing between thumbnails. The higher the number, the further the thumbnails are from each other.

```
this.fid_txt.colorTo(0xFFFFFF, 1);
```

The above hexadecimal can be changed to any color. This rollover color is for thumbnails MC. Currently its set to white.

```
this.colorTransformTo(114, 0, 114, 0, 114, 0, undefined, undefined, 0.2, “linear”);
```

When you rollover the big image, you get this nice dodge look, if you want to remove this, simple comment the above line out.

First Layer, First Frame | shop fla

If you want to customize the look and feel of the store, simply modify shop fla file. Once you have the file opened, go to Layer one, frame one and hit F9. This will bring up the actions panel. 25% of the actions script can be found here. Let me walk you through the coding:

Currency: If your currency symbol is not the dollar sign, simply edit the variable “currencySymbol” on line 17.

Stage Setup Section: No need to change anything here.

Multiple Images Section: This is where you can control the rollover and rollout colors when you have multiple images for a product. Currently the easing is set to vertical, you can however change this to horizontal. Ill show you how:

```
var v:Number = 1;
```

Simply change the above number to 10.

```
eval (“ai” + i).tween (“_x”, posX, 0, “easeOutCubic”);  
eval (“ai” + i).tween (“_y”, posY, 1, “easeOutCubic”);
```

If you are planning to go horizontal, you might also want to take advantage of the easing effect. Simply change the 0 to any number greater than 1 and less than 10.

```
this.addBorder.colorTo(0xFFFFFF, 1);
```

The above hexadecimal is for Multiple Images MC on roll over. Currently set to white.

Customizing the Colors:

Customizing Category MC: To customize the look of the category section simply, locate an MC called “menu_holder” in the library and edit the colors there. Look inside the “MovieClip” folder.

Customizing Thumbnail MC: To customize the look of the thumbnail holder, simply locate an MC called “bt” in the library. Here you can change the product text color, thumbnail bg color etc. Look inside the “MovieClip” folder.

Customizing Combo Box MC: To customize the look of the Combo Boxes, simply locate an MC called “Size ComboBox” or “Color ComboBox”. Here you can edit the text size, color and border colors. To edit the Actions script for the comoboboxes, simply locate the first Layer in “Size ComboBox” MC and hit F9 on your keyboard.

Customizing Additional Images MC: To Customize the look of the additional images movieclip, simply locate an MC called “AdditionalImages” in the library. Here you can change the bg color, text size + color.

Products.xml

```
<paypalEmail>info@tpnwebdesign.com</paypalEmail>  
<countryCurrency>CAD</countryCurrency>  
<defaultCategory>Sweaters</defaultCategory>
```

- 1) Substitute my email with yours. Unless you want to give me free money.
- 2) Change this to your country currency
- 3) This is the category that loads on default

New Category:

```
<type name = "New Category">
```

New Product:

```
<product>  
  <itemNumber>10</itemNumber>  
  <name>New Product</name>  
  <price>29.99</price>  
  <description>Description Goes Here</description>  
  <pic>one/small/1.png</pic>  
  <picture>one/big/one/1.jpg</picture>  
  <attribute1 title="Size">Small, Medium, Large</attribute1>  
  <attribute2 title="Color">Red, Blue, Green</attribute2>  
</product>  
</type>
```

Item Number: You can use any number you want to track the product.

Pic: Thumbnail picture for product.

Picture: Corresponding big picture for product.

Attributes: If you don't want the customer to choose any options simply leave this section blank. DO NOT DELETE any nodes. Simply leave them blank.

Remove Combo Boxes: Simply leave the attribute nodes BLANK.

ABOUT.FLA

This is pretty straight forward. Simply edit the text, hit CTRL + Enter and that's it.

CONTACT.FLA

First thing you want to do is change my e-mail to yours. Inside “contact“ folder, you'll see a php file called “mailer“. Simply open it and on line 18 change info@tpnwebdesign.com to your e-mail. Save it and that's it.

Once you open contact fla in Flash. Simply fill out your information on the left. It will automatically start the type-writing animation.

To edit the colors of the border for the input fields, simply go to layer one, frame one and hit F9. Once the actions panel is open, you can edit the border colors in the first few lines of the actionscript.

HOME.FLA

Frame one, Layer one, Hit F9 for actions panel:

```
sliderHeight = 120;
```

Simply change the highlighted text in red above to anything greater than 120 to have a bigger height for the three sliders on the bottom.

```
var v:Number = 10;
```

Currently the slideshow can handle upto 10 columns for the buttons, then it goes to the next row. If you want less, simply change the number above.

```
var space:Number = 2;
```

The above is the space between each buttons.

SLIDESHOW.XML

```
<product>
    <seconds>8</seconds>           // interval
    <client>Unlimited Images</client> // picture name
    <imgbig>home/image1.jpg</imgbig> // picture URL
    <link>http://www.flashden.net</link> // picture link
    <target>_blank</target>         // picture link target > _self or _blank
</product>
```

SERVICES.FLA

95% of the AS coding can be found inside “bar” MC. Once you open the movieclip go to Frame One, Layer One, Hit F9. This will bring up the actions panel.

```
_parent.bar['bt'+i]._alpha = 0;  
_parent.bar['bt'+i].alphaTo(100,.3,'easeoutcubic',i*.15);
```

If you want to remove the alpha fade in for thumbs, simply comment out the following above.

```
_parent.bar['bt'+i].onRollOver = function(){this.fd_txt.colorTo(0xDDDDDD, 1);}
```

Currently when you rollover the title and sub title, you get a gray overlay. If you want to change that to a different color, simply change the highlighted red to another hex. (ABOVE)

SERVICE MENU | To edit the top menu, simply locate an MC called “top_menu_header”

```
serviceRollOverColor = “333333”;  
serviceRollOutColor = “999999”;
```

To edit the rollover and rollout colors for the menu, simply edit the above hex.

```
var space:Number = 5;
```

The above coding is for spacing out the menu. The higher the number, the further away each menu item will be from each other.

```
<category>  
  <defaultCategory>LINKS</defaultCategory> // this is your default category to load  
  
  <type name = “LINKS”> // this is a new category  
    <product> // new service for LINKS category  
      <mainTitle>FLASH DEN</mainTitle> // service title  
      <subTitle>FLASHDEN.NET</subTitle> // service subtitle  
      <img>services/small/1.gif</img> // service thumb  
      <bigImg>services/links/fd.jpg</bigImg> // service big image  
      <des><![CDATA[<b>FlashDen</b>]]></des> // service description  
      <link>http://www.flashden.net</link> // service link  
    </product>  
  </type>  
</category>
```

PayPal Account: Please Sign up for a Free PayPal Merchant Account To start selling online:

<https://www.paypal.com/row/mrb/pal=E9ENJY6559SM6>

Easing: There are 21 easing effects in total:

easeinBack	easeOutBack	easeInOutBack
easeinBounce	easeOutBounce	easeInOutBounce
easeinCirc	easeOutCirc	easeInOutCirc
easeinCubic	easeOutCubic	easeInOutCubic
easeInelastic	easeOutElastic	easeInOutElastic
easeinExpo	easeOutExpo	easeInOutExpo
easeinSine	easeOutSine	easeInOutSine

Content Management System:

We do have a Content Management System, sold separately. Contact us for more info.
